

# Rising Signals in Basic Mechanism Research (2025-2026)

*Terms absent during 2022-2024, emerging in 2025 and growing in 2026*

|                                    | 2025       | 2026         |
|------------------------------------|------------|--------------|
| mediation analysis                 |            | 4            |
| brain-derived neurotrophic factor  | 1          | 3            |
| entorhinal cortex                  |            | 3            |
| auricular concha                   |            | 3            |
| fNIRS                              | 1          | 2            |
| synaptic plasticity                | 1          | 2            |
| promising neuromodulatory approach |            | 2            |
| physical exercise                  |            | 2            |
| parasympathetic reactivation       |            | 2            |
| oligodendrocyte precursor cells    |            | 2            |
| noise exposure                     |            | 2            |
| macrophage polarization            |            | 2            |
