Rising New Signals in Basic Mechanism Research (N=50)

	2025	2026
mediation analysis	0	4
brain-derived neurotrophic factor	1	3
protein level	0	3
synaptic plasticity	1	2
functional near-infrared spectroscopy (fnirs)	1	2
expression level	1	2
entorhinal cortex	0	3
central mechanism	1	2
auricular concha	0	3
ongoing event representation	0	2
vagal afferent fibers	0	2
signaling cascade	0	2
macrophage polarization	0	2
salivary alpha-amylase level	0	2
promoting neuroplasticity	0	2
promising neuromodulatory approach	0	2
physical exercise	0	2
oligodendrocyte precursor cells	0	2
selective alpha	0	2
parasympathetic reactivation	0	2
immune-inflammatory responses	0	2
hearing thresholds	0	2
gadd45 beta	0	2
transcriptomic analysis	0	2
task-evoked pupillary responses	0	2
event segmentation	0	2
sympathetic nervous system	0	2
enhancing cognitive function	0	2
controlled cortical impact	0	2
computational modeling	0	2
radical mastectomy	0	2
noise exposure	0	2
brain tissue	0	2
systolic bp	0	2
visuomotor association learning	0	2
vagusnervstimulation	0	1
vagus nerve-nucleus	0	1
vagus nerve stimulation alters	0	1
vagus biomarker	0	1
vagal withdrawal	0	1
vagal nerve stimulation (vns)	0	1
vagal engagement question	0	1
vagal electrophysiology expression	0	1
vma acquisition	0	1
vagal afferent fiber-nucleus tractus solitarius	0	1
unzureichend behandelte komplikation die eng	0	1
unilateral narrow-band noise	0	1
underlying neurophysiological mechanism	0	1
underlying molecular mechanism	0	1
underlying dysregulation	0	1
